## TRADITIONAL SCOTTISH BAKERS CHOOSE ALLEN R-XS INKJET CODER FOR NEW GLUTEN FREE MANUFACTURING FACILITY

Traditional Scottish craft bakers, JG Ross, turned to marking and coding specialist,

Allen Coding for advice and the supply of a **Hitachi**

**R-XS small character continuous**

**inkjet coder** for the application of date

codes and batch information to pre-

printed flow wrap for its new Gluten

Free manufacturing facility in

Portsoy, Aberdeenshire.

Established for over 50 years, fam-

ily run JG Ross operates 23 retail outlets and also supplies

wholesale customers throughout the North East of Scotland,

including Tesco, Scotmid, Co-op and RS McColl.

Cameron Ross, Director at JG Ross, comments: "We were recommended to Allen Coding by

our label applicator supplier and their sales engineer suggested the R-XS printer as being

most suitable for our production and packaging requirements."

The RX-S printer was selected for its ease of use and speed,

variety of substrates.

Cameron adds: "The training provided by Allen Coding was

very good and the RX-S has

been easy to install, learn and

and now operates on JG Ross' production line at up to 30

packs per minute (ppm), where it is installed on the film entry

feed.

Easy to install, operate and

clean and offering clarity of

print, the RX-S is best known for

being **user friendly and offering**

**accurate, high-speed printing**

of a wide range of information

in multiple languages on to a

maintain and the quality of print is always good."

"Based on our experience so far,

I would certainly recommend

Allen Coding and the RX-S to

other food companies," he con-

cludes.
